

Dear FCC,

I wish to file a formal complaint against the Sinclair Broadcasting company. My local station, WLOS, here in Asheville NC is owned by them and is apparently required to air Mark Hyman's "the point," part of "news central" during the evening news.

His comments are frequently biased and clearly aimed toward a personal or corporate political agenda. This section of the broadcast has little to do with local news and information--detracting from the show.

I have also recently heard that the sinclair group is planning to broadcast an anti democratic movie, pre-empting regular programming. It doesn't seem just, and, I believe may be illegal, for the company to air politically biased programmes in the guise of news over the public airways.

I ask that you take action against sincliar to prevent their abuse of the public airwaves, and not honor their request to renew their license in this area, and any other area they are planning this kind of activity.

Thank you for your time.

Sincerely,

Peter Brezny
